DETAILED ACTION - ALLOWANCE

Claims 1-20 are allowed. All claims thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided below in the paragraph which follows below.

Reasons for Allowance

The instant application is deemed to be directed to a nonobvious improvement over the invention of Albert (U.S. Patent No. 6,392,786) disclosed by applicant as being a representative example in the art to which the instant invention pertains. Albert describes, *inter alia*, how spacers may be incorporated into a flexible electro-optic display medium to reduce the susceptibility of the medium to mechanical damage during repeated bending or flexing. The present invention provides particular improvements which may be used in place of, or in combination with, such spacers to reduce the susceptibility of said medium to such damage. In particular, the present invention provides: an encapsulated electrophoretic medium comprising plurality of capsules dispersed in a polymeric binder having a shear modulus of at least about 10 mPa at 20°C (Claim 1, Lines 8-9); an electro-optic display comprising a layer of the aforesaid encapsulated electrophoretic medium (Claim 6, Lines 2-9); an electro-optic display comprising a plurality of spacers extending away from a supporting surface, a protective sheet contacting the ends of said spacers, and an electro-optic medium supported by said protective sheet (Claim 9, Lines 2-6); and a particular display comprising a plurality of spacers, tensioning members extending between at least two of said spacers, and an electro-optic medium supported by the tensioning members (Claim 15, Lines 2-9). The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Remarks/Information

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any other inquiry concerning this communication or earlier communications from the examiner should be directed to David N. Spector whose telephone number is (571) 272-2338. The examiner can normally be reached at this number Monday through Friday between 6:00 AM and 2:30 PM. The fax number for the organization where this application is assigned is (703) 872-9306.
